SOUND ABSORPTION - PLATE PYRAMID

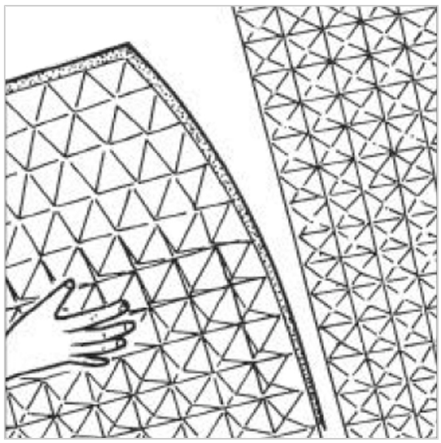

Code: 211819/0

Pyramid acoustic foam panels improve sound insulation, reduce echo and noise, and create a better working environment.

Link to the product →

Technical data/items supplied

- Board size max. 1000 x 1000 mm
- Pyramid height 50 mm, Total board thickness 70 mm, Pyramid pitch 100 mm
- Material: PUR-foam, anthracite, 70mm
- coefficient of thermal conductivity at 0°C 0,032 W/mK
- Fire protection classification 3
- **Other strenghts and perfomances on request**
- Weight = 1.500 kg/piece

Applications

- Primary noise protection by enclosing noise sources
- Secondary sound insulation in lounges, master offices, etc.

Assembly

- Fixing by gluing to the substrate
- Depending on the substrate, suitable adhesives are available upon request
